

Manico FunTable

32" Interactive Surf Tablet for kids

Manico FunTable is an **interactive desktop for kids**. It's just like a Touch Pad, but bigger and better. Kids can simultaneously point, touch, click, drag objects, draw, play and/or do homework, school projects etc. It's mobile enough to be placed wherever you want, but stable and sturdy enough to survive kids having fun.

Allow kid's creativity to flow freely, using (playing) with the unit's limitless access to games and/or educational applications, stimulating their minds to absorb knowledge, without even noticing it.

Manico FunTable is an interactive 32" touchscreen, built into a sturdy and attractive box, along with an Android computer, Wi-Fi, a power supply and an optional battery, enabling the unit to be placed on any flat surface at schools,

libraries, supermarkets or any private or public place, where kids need to be engaged in an entertaining and/or educational way. The surface is a 5mm anti reflex, – scratch or – crush glass (kid safe).

No installation at all. Just connect to power and start using it. Download, any application available at Google Playstore, or any of the countless pedagogic educational applications available from 3rd party suppliers.

Kindergarden – Schools – Private and/or public facilities

Interactive Display Technology
